

# Center For Domestic Preparedness FEMA

Emergency Response Community  
Preparedness Training

## CDP YouTube Video Training Opportunities

**Precautions and Controls for Coronavirus Disease 2019 (COVID-19).** Coronaviruses are a large family of viruses that are common in people and many different species of animals, including camels, cattle, cats, and bats. Rarely, animal coronaviruses can infect people and then spread between people such as with Middle Eastern Respiratory Syndrome (MERS-CoV), Severe Acute Respiratory Syndrome (SARS-CoV), and now with this new virus (named SARS-CoV-2). The SARS-CoV-2 virus is a beta-coronavirus, like MERS-CoV and SARS-CoV. All three of these viruses have their origins in bats. The SARS-CoV-2 virus causes the Coronavirus Disease 2019 (simply called COVID-19).
